The default choice of user is landlord. When registering as a landlord there are similar fields to student with the appropriate different addition. The only change between the two user options is “Company Name” for a landlord. There are no limitations to entering the data, however it would be advised to put in appropriate data into the text fields.

There are the same text fields for students and there is landlord. The only difference is the “University” text field over “Company Name”.

Login

For the Login, it is advised to use our login credentials provided below, due to their being pre-defined data in the database for test uses. As described before, there are two different user types. The two different login details for test uses are at the top of the document.. It is worth taking a note that the username field and password field is case sensitive. Also when logging in, make sure that you wait for the home page to load.

Home Page

Student

When a student logs in there is a list of properties nearby. Each property is clickable and it will bring you to a property detail page. Which is shown on the left. It is possible that the process of loading the property detail page is slow, due to internet connection or the database. You can click the “Add to Favourite” button, if you haven’t got it in your favourites already, to add the property to one of your

favourites. There's a pop up to confirm this. If you already have it in your favourites there is a button to remove it from your favourites in its place. There is also a section for the reviews of that property.

Review

House Checker

Review Title

Please rate the property out of 10 in the following categories.

Cleanliness

Overall cleanliness of the property when you moved in.

Landlord

How helpful was your Landlord with any problems/queries regarding the property.

Value

Was the rent price you paid worth the value of the property.

Location

Was the location suitable for your needs, university shops etc.

Was the location suitable for your needs, university shops etc.

Extra Comments

ADD REVIEW

Clicking the “Add Review” button allows you to add a review for the property you are currently viewing. There is only two text fields. The first being the title of your review and the second being any additional comments to add to the review. The star system is to rate what you think of each individual aspect of the accommodation. Once complete click the “Add Review” button at the bottom.

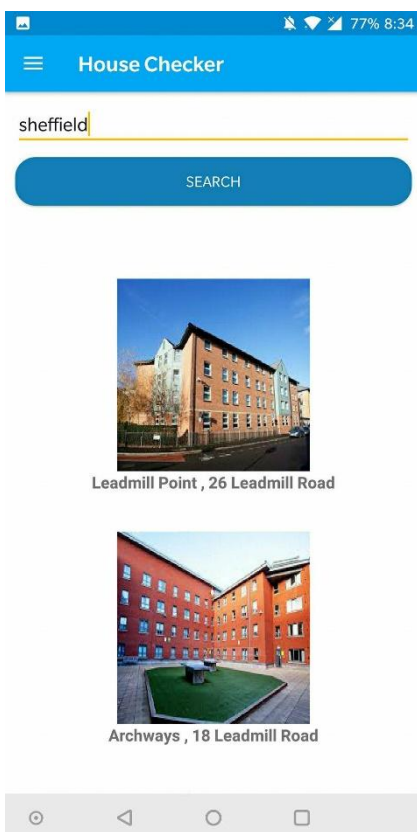

Navigation

If you want to swap between the pages there is a side bar that you can use . It contains all the existing pages in the app. Other than the default pages, students have the addition “Saved Properties” and “My Reviews” pages. The “Saved Properties” page has your favourite properties on it. The “My Reviews” page it has every review that you have written. The only extra feature of this worth taking a note on is “Logout”. This is where you can log out of your user and it navigates you back to the home screen.

Properties

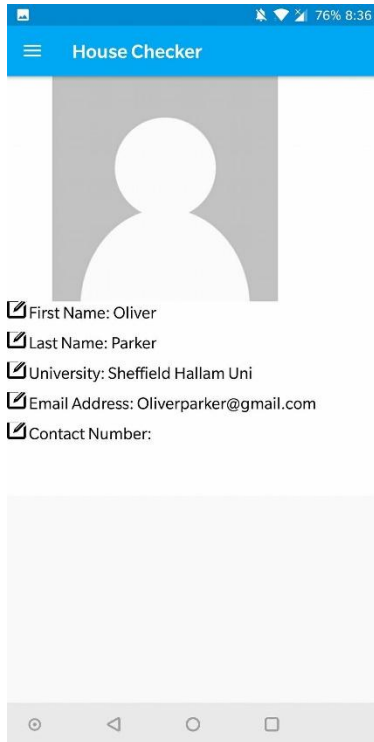

When clicking on the properties tab it loads in to your current location. (NOTE: You need to have your location services on before clicking on the page). With using the embedded google maps, you can see the other properties in the area. Clicking onto one of the pins, not the current location one, will bring up the property detail page that was shown before.

Search

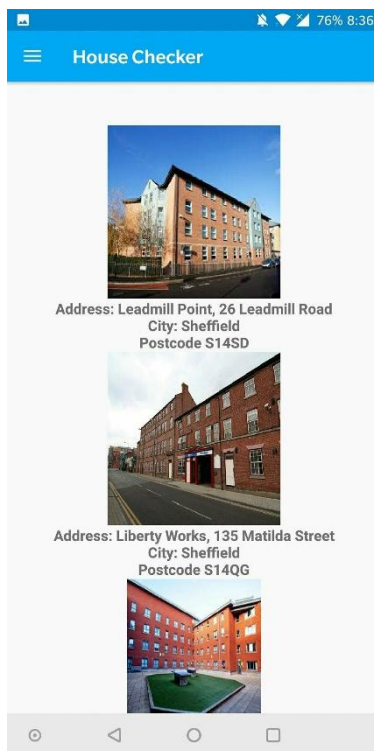

Using the navigation side bar navigate to the “Search” page. You should be able to type in at the top your desired city. For the sake of testing it is advised to type in Sheffield, as this is the place with the most properties in the database. You should come to the page, as seen on the left. Clicking on the check button allows you to view to property. This directs you to the “Property Detail”, as seen before.

Profile

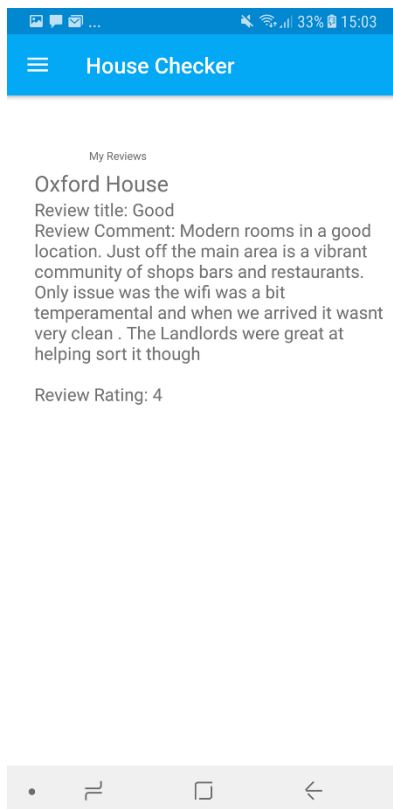

The profile page displays the details of the user that you are currently logged in with.

Favourite Properties

The favourite page displays the properties that you have added into your favourite list. You can click on the properties and see the “Property Detail” page for it.

My Reviews

My reviews page displays the details of each review that you have made. Nothing is interactable on this page, as there is no use for clicking the information displayed.

My Properties

Once logged in as a landlord, you can see which properties you own, in the “My Properties” page. It is possible to see the details of each property. This shows the property detail page that was shown before, just without the ability to add to favourites.

Add a Property

A screenshot of a mobile application interface titled 'House Checker'. The status bar at the top shows a battery level of 75% and the time 8:53. The app has a blue header with a menu icon and the title 'House Checker'. The main content area is white and contains a form with the following fields: 'Address 1', 'Address 2', 'City', 'Postcode', 'Number of Bedrooms' (with a dropdown menu showing '1'), 'Number of Bathrooms' (with a dropdown menu showing '1'), 'WIFI Included' (with radio buttons for 'Yes' and 'No', where 'Yes' is selected), 'Bills Included' (with radio buttons for 'Yes' and 'No', where 'Yes' is selected), and 'Price PW'. The bottom of the screen shows standard Android navigation icons.

As a landlord you can add a new property, by going to the “Add a Property” page. There is a form of details that you need to enter. Once complete click the “Add Property” button, this add the property into the landlords list of “My properties”.
